Submitted in partial fulfillment of the requirements for the degree

BCA

September 2023-24

Guided By

Ms. PITUKUMARI BERA

Bachelor of Computer Application

Christ College, Rajkot

(Affiliated to Saurashtra University, Rajkot 360 005)

Certificate

We hereby certify that the work which is being presented in the BCA SEM-5 project report entitled “Rama estate”, in partial fulfillment of the requirements for the award of the **Bachelor of Computer Application** and submitted to the **Dept. Computer Application, Christ College, Rajkot** is an authentic record of our own work carried out during a period from November 2023 to September 2024 under the supervision of **Ms. Pintukumari Bera**.

Signature of Students

1.Meet Sakariya

[003203213123]

2.Mayank Vaghasiya

[003203213113]

This is to certify that the above statement made by the candidates are correct to the best of my knowledge.

Head

Dr. Shailendrasinh Jadeja

Dept.of Computer Application
Christ College, Rajkot

Guide

Ms. Pintukumari Bera

Dept.of Computer Application
Christ College, Rajkot

Acknowledgement

When we embarked this project, it appeared to us as onerous task. Slowly as we progressed, we did realize that we were not alone after all. We wish to express our gratitude to **Rev.Dr.Fr.Jommon Thommana, Director of CHRIST COLLEGE, Dr. Yvonne Fernandes, principal of CHRIST COLLEGE** and all faculty members, Project guide who have extended their kind help, guidance and suggestion without which it could not have been possible for us to complete this project report.

Our sincere thanks to our faculty members Ms. Kruti Kotak for offering us all kinds of support and help in preparing the project. We are deeply indebted to our guide **Ms. Pintukumari Bera** for not only her valuable and enlightened, guidance but also for the freedom she rendered us during this project work.

We are thankful to our group members and other classmates, well-wishers who with their magnanimous and generous help and support made it a relative easier affair. Our hearts go out to our parents who bear with us all the trouble we caused then with smile during the entire study period and beyond.

Meet Sakariya

Mayank Vaghasiya

BCA-September 2023

CHRIST COLLEGE, RAJKOT

Preface

The project named "Rama Estate" eliminates offline efforts for buying and selling goods (Products) and promotes online platform on which above things can be done in few clicks. With this module, owner can directly sale their goods and products online.

Which minimizes the seller efforts of going to a agency and contact with agent and also buyer effort of higher agent to search for property.

1. Introduction

1.1 Problem Statement

This system developed will reduce manual work and avoid redundant data . This system will help

to find residential property and save time . System will find reliable ,fast and nearby property.

1.2 Project Overview

Real Estate booking site have main two type of module.

- 1)Admin and seller can add property and all property managed by admin and seller own property manage by seller.
- 2) User can view property and add to wishlist and book appointment with owner of property.

1.3 Purpose of the Project

To provide best property without any agent . Buyer can directly fix appointment with seller.

System will provide best , fast and reliable property.

2 Existing System

2.1 Gap Analysis

Old System:

The older system was working slowly as compare to the current system of real estate booking site. Older system need more cost.

Current System:

The newer system has very good interface for the farmer, customer and admin of the system which makes it easy to use.

2.2 Need of Application

In our life everyone need property for resident. And this site provide residential home without any agent.

2.3 Feasibility Study

Technical Feasibility: this project is operational feasible as the website accessed by the admin to insert, update and delete the property on this website .

Operational Feasibility: The website is also technically feasible as it fulfills the hardware and software requirements

3 Requirements

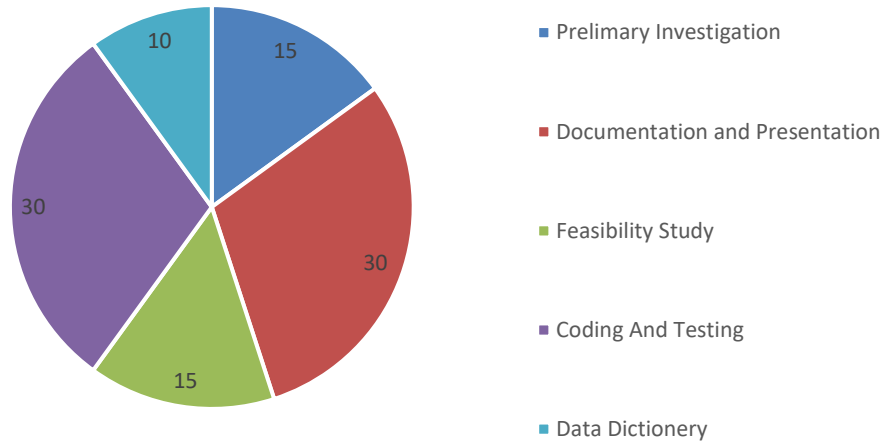

➤ Hardware

- RAM : 2 GB or Higher
- HDD : 80 GB or Higher
- System Type : 32 Bit or Higher

➤ Software

- Operating System : win 7 or Higher
- Frontend : HTML, PHP, CSS
- Backend : PHP
- Database : MYSQL
- MS office :
 - : PowerPoint - Presentation
 - : MS Word - Documentation
 - : MS Visio - Diagram

6 Data Dictionary

6.1 Data Flow Diagram

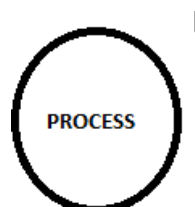

A DFD also known as “bubble chart” has the purpose of clarifying system requirements and identifying major transformations. It shows the flow of data through a system. It is a graphical tool because it presents a picture. The DFD may be partitioned into levels that represent increasing information flow and functional detail. Four simple notations are used to complete a DFD.

DATA FLOW

The data flow is used to describe the movement of information from one part of the system to another part. Flows represent data in motion. It is a pipe line through which information flows. Data flow is represented by an arrow.

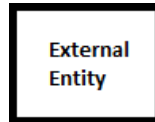

PROCESS

A circle or bubble represents a process that transforms incoming data to outgoing data. Process shows a part of the system that transforms inputs to outputs.

EXTERNAL ENTITY

A square defines a source or destination of system data. External entities represent any entity that supplies or receive information from the system but is not a part of the system.

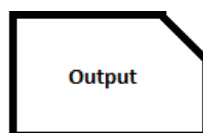

DATA STORE

The data store represents a logical file. A logical file can represent either a data store symbol which can represent either a data structure or a physical file on disk. The data store is used to collect data at rest or a temporary repository of data. It is represented by open rectangle.

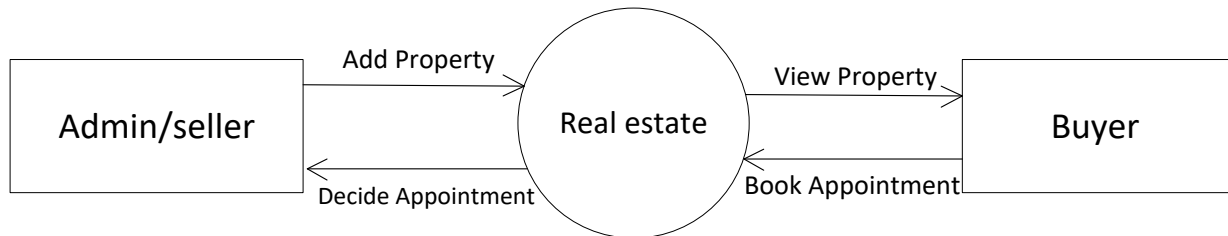

OUTPUT

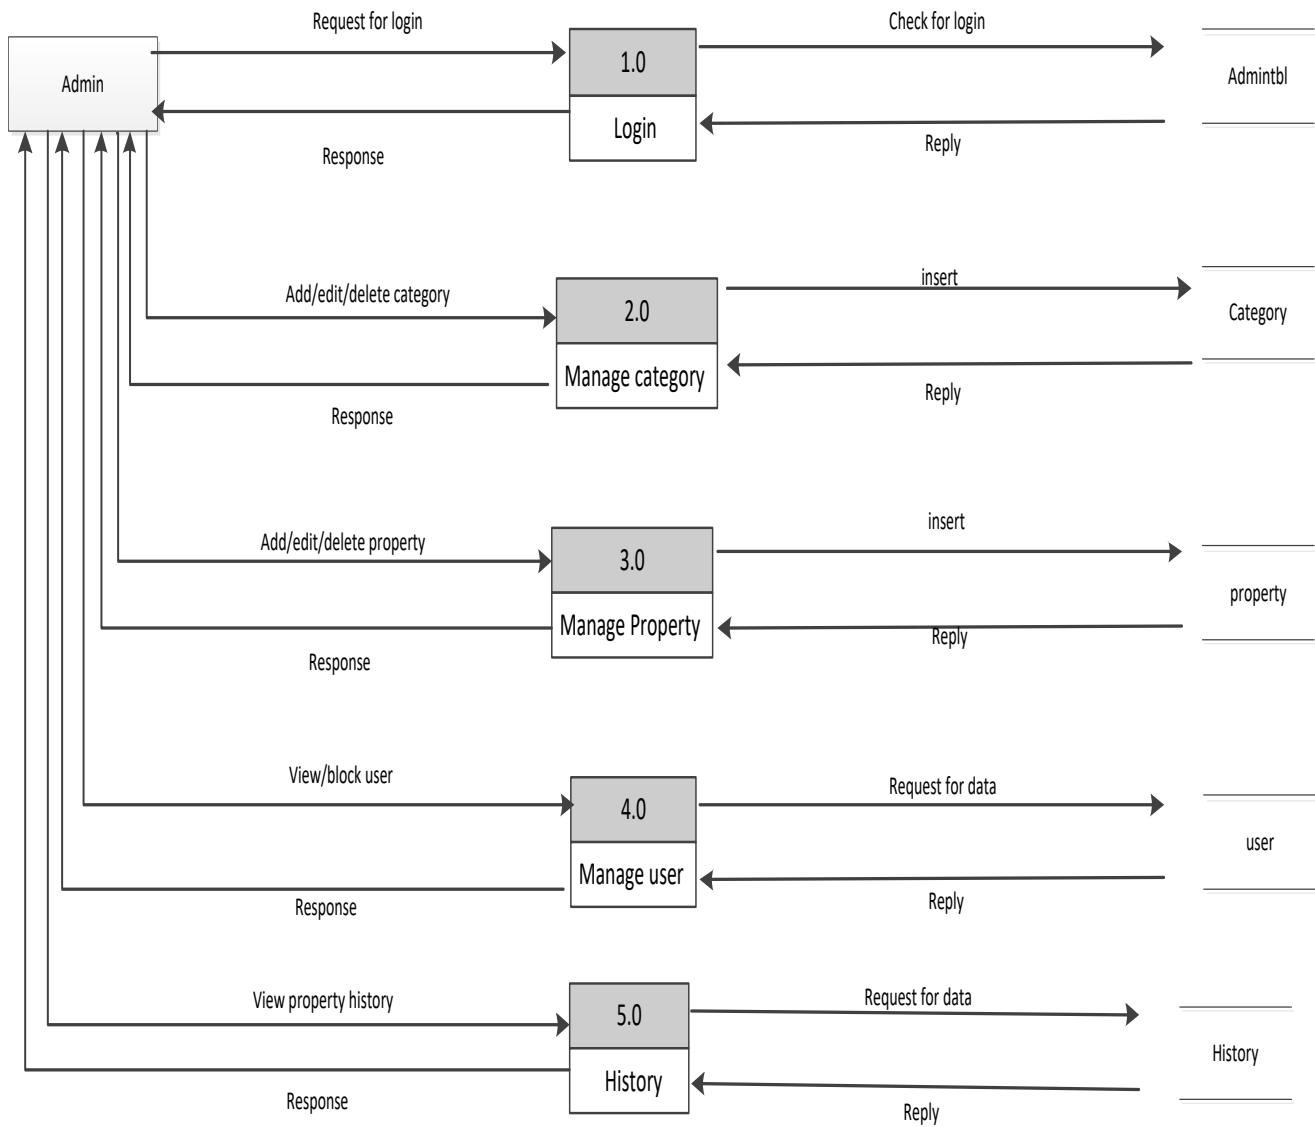

The output symbol is used when a hard copy is produced and the user of the copies cannot be clearly specified or there are several users of the output

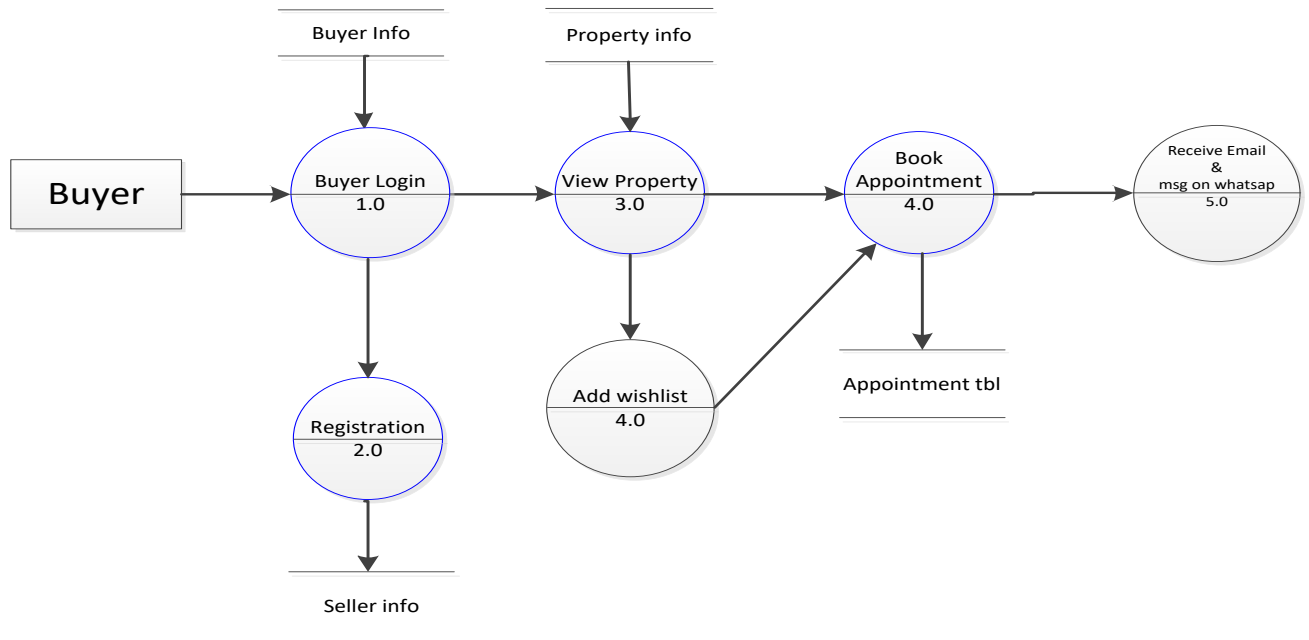

Dfd 0th level

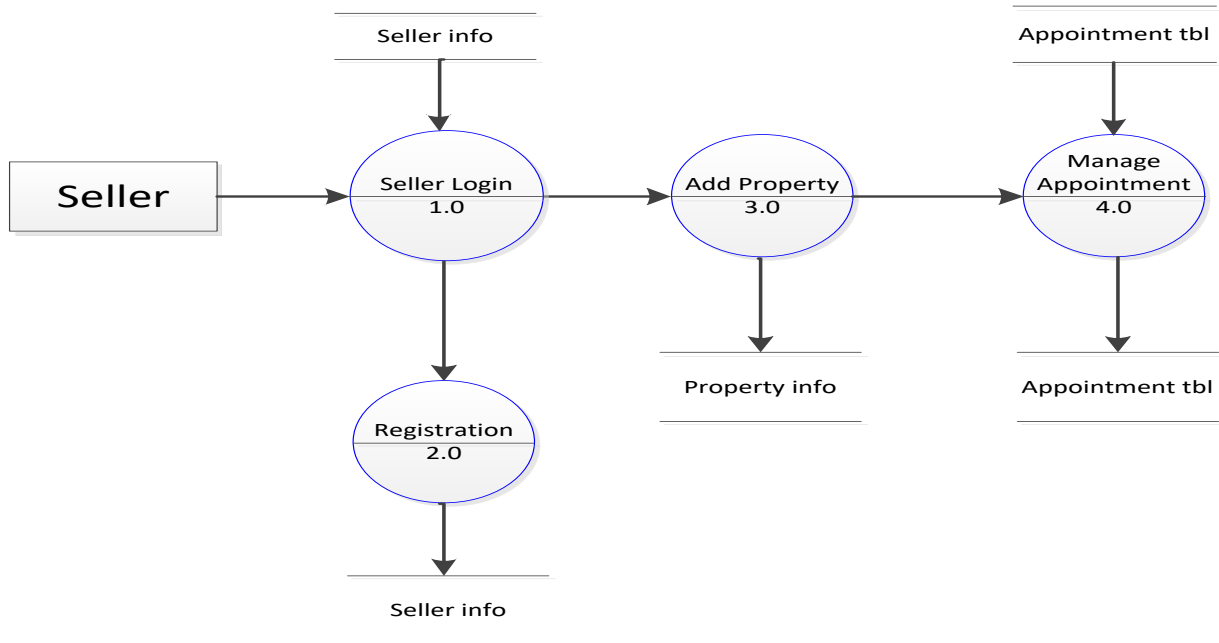

Dfd 1st Level(Admin)

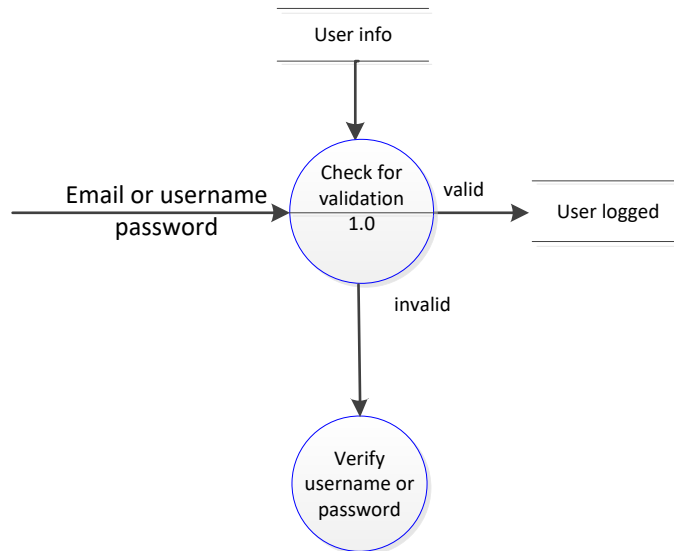

Dfd 1st level (Buyer)

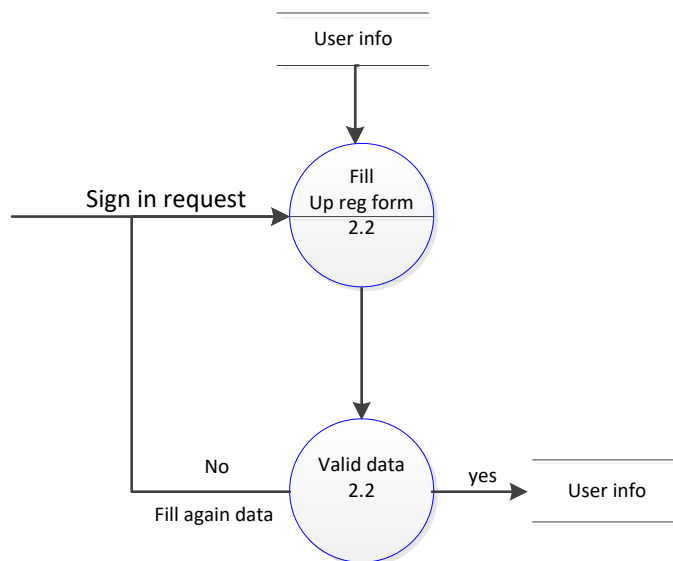

Dfd 1st level (Seller)

Dfd 2nd level for 1.0(login)

Dfd 2nd level for 2.0(registration)

6.2 List of Tables

6.2.1 Admin

8 Results

8.1 Testing

A Test Plan can be defined as a document describing the scope, resources, and schedule of intended Testing activities. A project may fail without a complete Test Plan. Test planning is particularly important in large software system development.

8.2 Test Case Result

No	Test	Action	Scenario	Result
1	Login	If email and password is correct	Redirect to home screen.	yes
		If user is not verified	Redirect to verification screen.	yes
		Any or Both Invalid	Alert box with Message “Your Login name or password in Invalid”.	yes
2	Register	If all details are Correct.	user registered successfully and verification OTP sent to mail.	yes
3	Book Appointment	Buyer book appointment.	Receive email .	yes

9 Conclusion

9.1 Future Enhancement

- Add more Main category.
- Expand in More City.

9.2 Limitations

- This application is used for particular one class.
- User can not register by application.
- This application needs internet application.

10 Bibliography

PHP

PHP is a script language and interpreter that is freely available and used primarily on Linux Web servers. PHP, originally derived from Personal Home Page Tools, now stands for PHP: Hypertext Preprocessor.

MySQL

MySQL is an Oracle-backed open source relational database management system (RDBMS) based on Structured Query Language (SQL).

Html

HTML (Hyper Text Markup Language) is the code that is used to structure a web page and its content. For example, content could be structured within a set of paragraphs, a list of bulleted points, or using images and data tables.
